NCMC Activity Point Program

Submitted for successfully completed the NCMC Activity Point Program

During 7th Semester

In

INFORMATION SCIENCE AND ENGINEERING

Submitted By

DEEPAK G C [1JB21IS035]

UNDER THE GUIDANCE OF

Mrs. Prathima K M

Assistant Professor

DEPARTMENT OF INFORMATION SCIENCE AND ENGINEERING

SJB INSTITUTE OF TECHNOLOGY

B G S HEALTH AND EDUCATION CITY

Kengeri, Bangalore-560060.

ACKNOWLEDGEMENT

I would like to express my profound grateful to **His Divine Soul Jagadguru Padmabhushan Sri Sri Sri Dr. Balagangadharanatha Mahaswamiji** and His Holiness **Jagadguru Sri Sri Sri Dr. Nirmalanandanatha Swamiji** for providing me an opportunity to be a part of this esteemed institution.

I would also like to express my profound thanks to **Revered Sri Sri Dr. Prakashnath Swamiji, Managing Director, SJB Institute of Technology,** for his continuous support in providing us an opportunity to pursue our engineering programme.

I express my gratitude to **Dr. K V Mahendra Prashanth, Principal, SJB Institute of Technology,** for providing me an excellent facilities and academic ambience; which helped me in satisfactory completion of **NCMC activity.**

I extend my sincere thanks to **Dr.Shashidhara H R, HOD, Professor & Head, Dept. of Information Science And Engineering** for providing us invaluable support throughout the period of our **NCMC activity**.

I wish to express our heartfelt gratitude to **Mrs. Prathima K M, Assistant Professor and NCMC activity point's coordinator, Dept. of Information Science and Engineering** for her valuable guidance, suggestions and cheerful encouragement.

I wish to express our truthful thanks to **Mrs. Prathima K M, Assistant Professor, Dept. of Information Science and Engineering** for her valuable guidance, suggestions and cheerful encouragement.

Regards,

DEEPAK G C-[1JB21IS035]

MODULE-01

CRICKET

1.1 INTRODUCTION TO CRICKET

Cricket is a sport that is of the same basic form as baseball and softball – a batter hits a ball thrown to him and tries to score runs, and not get out, And it is one of the most popular sports in the world(after soccer).

The basics

There are two teams, with eleven players each (instead of nine as in baseball). Instead of four bases, there are only two; in the middle of the field, sixty-six feet apart, called ***wickets***. All running is between the two wickets; the ball can be hit in front, or behind… or, in any direction. Instead of rotating batting for nine innings each, each team does all its batting in a single inning.

The team scoring more runs wins the game.

The cricket ball is slightly larger than a baseball, but is as hard; and the bat is flat on one side, and wider, but of similar length.

Pitching (bowling)

Unlike baseball, where a pitcher continues until replaced, cricket pitchers (***bowlers***) rest every 6 pitches as their pitching rotates. The fielding team works with two bowlers at the same time.

The first bowler throws (***bowls***) from one wicket to the other. After six throws (***balls***), the catcher (***wicket-keeper***) moves around behind the first bowler's wicket, bowler #2 takes over. He bowls six balls in the opposite direction (i.e. bowler's wicket). The two pitchers keep alternating like this, until one or both of them are relieved. Each six-ball set is called an "**over** ".

Cricket bowling is different from baseball pitching. The bowler is allowed to take a run-up to bowl, unlike the baseball pitcher who pitches from a fixed starting point. The bowler also has to bowl with a straight arm with their arm rotating in a windmill action, unlike the pitcher who gains most of their speed from the throwing motion. Lastly in cricket the ball is aimed to bounce before it reaches the batsman, making the condition of the ground between bowler and batsman very important.

Batting

The major difference from baseball is that batters (***batsmen***) can hit in any direction. The batsman can run when he chooses to, not every time he gets a hit, as in baseball. He is safe as long as he protects his wickets with his bat (not his feet or hands) and makes no other errors. As long as the batter can protect his wicket, he is free to keep batting, and scoring, as long as he can!

The main three ways a batsman is OUT are if

- Any of the three sticks marking his wicket (called "***stumps***") are hit by the bowler – he is

"***bowled***" (like being struck out, except that once is enough).

- The ball is hit into a fielder's hand without touching the ground, he is "***caught***" (like baseball's pop fly).
- If he is running between the wickets, and a fielder can break the wicket he is running to with the ball, before the runner crosses the "safe line" in front of the wickets, he is "***run out***" (like a tag, except in cricket you tag the base, not the runner).

A cricket batsman could be out on the first pitch, but otherwise would go on batting until someone puts him "out", Some batters can stay in for hours, scoring 50, 100 runs or more!

1.2 RULES FOR CRICKET

Cricket is played between two teams each made up of eleven players. (Sometime in junior competitions you will find 8 player teams).

Games comprise of at least one innings where each team will take turns in batting and fielding/bowling.

The fielding team will have a bowler bowl the ball to the batsman who tries to hit the ball with their bat.

The fielding team tries to get the batsmen out by:

- Hitting the wickets with the ball when bowling.
- Catching a batsman's shot on the full
- Hitting the batsman's leg in front of the wicket (LBW)
- Hitting the wickets before the batsmen can run to the other end of the pitch

The batmen try to score as many runs as possible before getting out by:

- Hitting the ball and running between the wickets and making it to the other end before the fielders can hit the wickets with the ball. Each time you run one full length of the pitch it equals 1 run.
- Hitting the ball to the boundary along the ground is 4 runs.
- Hitting the ball over the boundary on the full equals 6 runs.
- The fielding team must get 10 batsmen out before they can change over and start batting.

The aim of the game is to score as many runs as possible before the fielding team takes 10 wickets. The team with the most runs wins.

1.3 OVERVIEW OF CRICKET

Cricket is a bat-and-ball game played between two teams of eleven players on a field, at the center of which is a 22-yard (20-meter; 66-foot) pitch with a wicket at each end, each comprising two bails (small sticks) balanced on three stumps. Two players from the batting team, the striker and non-striker, stand in front of either wicket holding bats, while one player from the fielding team, the bowler, bowls the ball toward the striker's wicket from the opposite end of the pitch.

The batting team scores runs by striking the ball with the bat and then running between the wickets, or hitting boundaries. The fielding team tries to prevent runs by catching the ball or hitting the wicket with the ball to dismiss a batsman. The team that scores the most runs in their allotted overs or time wins the match.

Cricket is a game of skill, strategy, and endurance. It is played in a variety of formats, including Test matches, One Day Internationals (ODIs), and Twenty20 (T20) matches. Test matches are the longest format of the game, lasting up to five days. ODIs are shorter, lasting one day, and T20 matches are the shortest format, lasting just 20 overs per side.

Cricket is a popular sport in many countries around the world, particularly in the Commonwealth nations such as England, Australia, India, Pakistan, and the West Indies.

MODULE-02

KABADDI

2.1 INTRODUCTION

Kabaddi is a traditional team sport that has its origins in ancient India. It is a fast-paced, high-energy game that combines elements of physical strength, strategy, and agility. Played between two teams, Kabaddi is particularly popular in South Asia but has gained recognition in other parts of the world as well. The objective of the game is for a "raider" from one team to enter the opposing team's half of the field, tag opponents, and return to their side without being tackled. Meanwhile, the defenders must attempt to stop the raider by either tagging or physically restraining them.

The game is played on a rectangular field, and the action occurs in two main phases: the raiding phase, where the raider attacks, and the defending phase, where the opponents try to stop the raider. Kabaddi is unique in its emphasis on both individual skills and teamwork, requiring players to exhibit endurance, strategy, and quick reflexes.

In addition to its competitive nature, Kabaddi is a sport that promotes physical fitness, discipline, and camaraderie. It is played at various levels, from local village tournaments to professional leagues like the Pro Kabaddi League (PKL) in India. The sport's simplicity and minimal equipment requirements make it accessible to players of all ages and backgrounds, contributing to its widespread appeal. The sport is divided into two main phases: the raiding phase and the defending phase. During the raiding phase, the raider's goal is to touch one or more players from the opposing team while ensuring they do not get caught or tagged. The defending team’s goal is to prevent the raider from escaping back to their side of the field. A point is awarded to the team for either successfully tagging an opponent or preventing the raider from returning to their side.

One of the most unique aspects of Kabaddi is its requirement for continuous physical contact, which not only tests players' strength and endurance but also their strategic thinking and teamwork. A raider must plan his moves, knowing when to attack, when to retreat, and how to work in unison with teammates to trap the opposing raider. Likewise, defenders must rely on quick reflexes and coordination to prevent a successful raid.

2.2 RULES FOR KABDDI

1. Objective of the Game

The primary objective of Kabaddi is to score points by sending a raider into the opponent's half, touching as many defenders as possible, and returning to the raiders own side without being tagged or caught. The defending team tries to stop the raider by tagging or tackling them before they return to their side.

2. Teams and Players

- **Team Composition**: Each team consists of seven players on the field at a time, with up to five substitutes.
- **Minimum Players**: A team must have at least seven players to compete.

3. The Raiding Process

- **Raider's Role**: One player from the attacking team, called the "raider," enters the opponent's half of the field, attempting to touch one or more defenders and return to their side.
- **Chanting**: The raider must chant "Kabaddi" continuously to show they are not holding their breath.
- **Success**: The raider scores a point for each defender they touch and successfully return to their side without being tagged.

4. The Defending Process

- **Defenders' Role**: The defending team's objective is to tag or tackle the raider before they return to their own side of the field.
- **Tagging**: If a defender tags the raider, the raider is "out" and the defending team earns a point.

5. Scoring

- **Touching Defenders**: The raiding team earns one point for each defender successfully touched by the raider.
- **Bonus Points**: If the raider crosses the bonus line in the opponent□s half and touches a defender, they earn a bonus point.
- **Outs**: If a raider is tagged, caught, or fails to chant, they are out, and the defending team gets a point.

6. All-Out

- **Definition**: An "All-Out" occurs when all the players of one team are out.
- **Bonus Points**: The opposing team earns 2 extra points when an All-Out happens.
- **Revival**: The team that has been "All-Out" gets all their players back after the opposing teams next raid.

2.3 OVERVIEW OF KABDDI

Kabaddi is a fast-paced, traditional team sport that combines strength, strategy, and agility. Originating in ancient India, it is played widely in South Asia and has grown into a popular sport worldwide. The game is typically played between two teams of seven players each on a rectangular field.

The objective of Kabaddi is for one player, known as the "raider," to enter the opposing team's half of the field, touch one or more defenders, and return to their side without being tagged or tackled. The raider must chant "Kabaddi" continuously while on the attack to show they are not holding their breath. Defenders, on the other hand, try to stop the raider by tagging or tackling them.

The sport has a simple yet thrilling scoring system, with points awarded for successful raids, defensive actions, and "bonus points" for crossing a designated line in the opponent's half. Kabaddi involves alternating turns between offense (raiding) and defense, and when all players of a team are out, it is called an "All-Out," granting the opposing team extra points.

Kabaddi is known for its physical demands, requiring players to be fit, quick, and strategic. It promotes teamwork, physical fitness, and discipline. The sport is played at various levels, from local tournaments to professional leagues like the Pro Kabaddi League (PKL), making it increasingly popular internationally.

MODULE-03

VOLLEY BALL

3.1 INTRODUCTION

Volleyball is a dynamic, team-based sport that combines athleticism, strategy, and coordination. Played on both indoor and outdoor courts, the game typically involves two teams of six players each, divided by a net. The primary objective is to score points by sending the ball over the net and into the opponent's side of the court in a manner that prevents the opposing team from returning it successfully.

The game begins with a serve, where one team serves the ball to the other team. The receiving team must return the ball using a series of passes, sets, and attacks (spikes). Players use their hands and arms to control the ball, although other body parts can also be used in certain circumstances. Teams are allowed three touches to return the ball, with the common sequence being a pass (or bump), a set, and a spike (or attack). The ball must be hit cleanly, and any violation, such as carrying or double-touching the ball, results in a point for the opposing team.

The scoring system in volleyball is typically based on rally points, meaning a point is awarded on every rally, regardless of which team served. Matches are usually played in a best-of-three or best-of-five set format, with each set played to 25 points. If a deciding set is required, it is usually played to 15 points. A team must win by at least two points to secure a set.

Volleyball is renowned for its emphasis on teamwork and communication. Players must work together to execute well-timed passes, set the ball accurately, and spike it with power and precision. Defensively, teams must work together to block the opponent's spikes or "dig" the ball to keep it from hitting the ground. Each player has a specialized role, such as the setter, spiker, or libero (a defensive specialist), but success relies on strong team coordination.

The sport has a global following, with millions of people playing it recreationally and professionally. Volleyball is an Olympic sport, and there are professional leagues around the world, such as the Fédération Internationale de Volleyball (FIVB) World Championship and the Olympic Games. Additionally, beach volleyball is a popular variant played in the sand, typically with two players per team.

3.2 RULES OF VOLLEY BALL

1. Objective of the Game

- The main goal is to score points by sending the ball over the net and into the opponent's court in such a way that they cannot return it successfully.
- A point is awarded when the ball lands on the opponent's court, or if the opposing team commits a fault (e.g., hitting the ball out of bounds or failing to return it).

2. Teams and Court

- **Teams**: Each team consists of six players on the court at a time, with substitutes available.
- **Court**: The court is rectangular (18 meters long and 9 meters wide), divided into two equal halves by a net. The court is further divided into a back row and front row for each team.

3. Scoring System

- Volleyball uses rally-point scoring, meaning a point is awarded on every rally, regardless of which team served the ball.
- **Sets**: A match is played in sets. The first team to win three sets (or sometimes two) wins the match.
- **Set Score**: Regular sets are played to 25 points, while the deciding set (if needed) is played to 15 points. A team must win by at least 2 points.
- **Winning the Match**: The team that wins the required number of sets wins the match.

4. Serving

- **Starting Play**: The game begins with one team serving the ball. The player serving must stand behind the baseline and serve the ball over the net into the opponent's court.
- **Service Rotation**: After each rally, teams rotate positions clockwise. The player who rotates into the serving position must serve the ball.
- **Serving Faults**: A fault occurs if the server steps on or over the baseline, fails to hit the ball over the net, or serves the ball out of bounds.

5. The Rally

- **Ball Contacts**: Each team is allowed a maximum of three contacts (passes, sets, or attacks) to return the ball over the net. These contacts are typically a pass (bump), set, and spike.
- **Ball Handling**: The ball must be hit cleanly. Players are not allowed to carry, hold, or double-touch the ball.
- **Attack**: Players in the front row are allowed to attack the ball (spike) over the net. Players in the back row can also attack but must jump from behind the 3-meter line.

3.3 OVERVIEW OF VOLLEY BALL

Volleyball is a fast-paced, dynamic team sport played between two teams, each typically consisting of six players. The game is played on a rectangular court divided by a net, with the primary objective being to score points by sending the ball over the net and into the opponent's court, while preventing them from returning the ball.

The game begins with one team serving the ball from behind the baseline to the opponent's side. The opposing team must then return the ball within three touches, usually involving a pass (bump), a set, and a spike (attack). The ball must be hit cleanly, and players cannot carry or double-touch the ball. Teams are allowed three touches to return the ball, and if they fail to do so, the opposing team earns a point.

The sport is played in sets, typically to 25 points, and a match is won by the first team to win three sets (or two, in some cases). If a deciding set is needed, it is played to 15 points. The game uses a rally-point scoring system, where a point is awarded on every rally, regardless of which team served.

Volleyball is known for its emphasis on teamwork, as players must coordinate their efforts to pass, set, and attack the ball effectively. Positions are specialized, with players in the front row focusing on attacking and blocking, while back-row players focus on defense and passing. The game also requires quick reflexes, agility, and excellent communication between teammates.

MODULE-04

HOCKEY

4.1 INTRODUCTION

Hockey is a term used to denote a family of various types of both summer and winter team sports which originated on either an outdoor field, sheet of ice, or dry floor such as in a gymnasium. While these sports vary in specific rules, numbers of players, apparel, and playing surface, they share broad characteristics of two opposing teams using sticks to propel a ball or disk into a goal.

There are many types of hockey. Some games make the use of skates, either wheeled or bladed, while others do not. In order to help make the distinction between these various games, the word hockey is often preceded by another word, as in field hockey, ice hockey, roller hockey, rink hockey, or floor hockey.

In each of these sports, two teams play against each other by trying to manoeuvre the object of play, either a type of ball or a disk (such as a puck), into the opponent's goal using a hockey stick. Two notable exceptions use a straight stick and an open disk (still referred to as a puck) with a hole in the center instead. The first case is a style of floor hockey whose rules were codified in 1936 during the Great Depression by Canada's Sam Jacks. The second case involves a variant which was later modified in roughly the 1970s to make a related game that would be considered suitable for inclusion as a team sport in the newly emerging Special Olympics. The floor game of gym ringette, though related to floor hockey, is not a true variant because it was designed in the 1990s and modelled on the Canadian ice skating team sport of ringette, which was invented in Canada in 1963. Ringette was also invented by Sam Jacks, the same Canadian who codified the rules for the open disk style of floor hockey 1936.

Certain sports which share general characteristics with the forms of hockey, but are not generally referred to as hockey include lacrosse, hurling, camogie, and shinty.

4.2 RULES OF HOCKEY

The rules of hockey vary depending on the type of hockey being played, but the core principles of fair play, scoring, and team competition remain consistent. Below are the general rules for the most common forms of hockey:

1. General Rules (Applicable to All Types)

- **Team Composition**:
  - Each team has a set number of players, including goalkeepers. Substitutions are allowed.
- **Objective**:
  - Score goals by hitting the puck or ball into the opponent's net.
- **Duration**:
  - Matches are divided into halves or periods, with a specific time limit for each.
- **Fair Play**:
  - Players must adhere to the rules, and referees enforce penalties for violations.

2. Rules of Field Hockey

- **Team Size**:
  - 11 players, including a goalkeeper.
- **Game Duration**:
  - Two halves of 35 minutes each with a 10-minute halftime break (can vary by level).
- **Field**:
  - Rectangular, 100 yards long and 60 yards wide.
- **Equipment**:
  - Curved sticks and a ball. Players can only use the flat side of the stick.
- **Scoring**:
  - Goals can only be scored from inside the shooting circle (D).
- **Fouls**:
  - No using the back of the stick, no dangerous play, and no body contact.
- **Penalties**:
  - Include free hits, penalty corners, and penalty strokes for severe fouls.

Key Penalties Across Hockey Types

- **Minor Penalties**:
  - Fouls like high-sticking, tripping, or obstruction.
- **Major Penalties**:
  - Serious infractions like deliberate body-checking or fighting.
- **Penalty Shots**:
  - Awarded for a clear scoring opportunity denied by a foul.

4.3 OVERVIEW OF HOCKEY

Hockey is a dynamic and versatile sport played globally in various forms, including ice hockey, field hockey, and roller hockey. Its rich history, fast-paced nature, and requirement for skill, strategy, and teamwork make it a beloved game worldwide. Below is an overview of the key aspects of hockey.

1. The Game

- **Objective**:
  To score more goals than the opposing team by directing a ball or puck into the opponent's net using a stick.
- **Players**:
  Each team has a set number of players (e.g., 11 in field hockey, 6 in ice hockey), including a goalkeeper.
- **Field of Play**:
  Hockey can be played on ice rinks, grass fields, artificial turf, or hard surfaces, depending on the variation.

2. Variations of Hockey

- **Ice Hockey**: Played on ice with skates; widely popular in North America, Europe, and parts of Asia.
- **Field Hockey**: Played on grass, turf, or indoors; common in Europe, Asia, and Australia.
- **Roller Hockey**: Played on roller skates; includes quad and inline hockey.

3. History

- Hockey has ancient origins, with evidence of similar games played in Egypt, Greece, and Persia.
- Modern field hockey evolved in England during the 19th century, while ice hockey was formalized in Canada in the late 1800s.
- Today, hockey is a global sport with prestigious leagues and tournaments.

4. Equipment

- **Common Items**: Sticks, protective gear, and either a ball (field/roller hockey) or puck (ice hockey).
- **Player Safety**: Helmets, pads, and mouthguards are essential in most forms of hockey.

5. Key Rules

- Goals must be scored within designated areas (e.g., shooting circle in field hockey).
- Fouls such as high-sticking, obstruction, and dangerous play result in penalties.
